SUMMARY

Motivated B.Tech Information Technology student with a strong foundation in Java, SQL, DBMS, and software development. Experienced in developing database-driven applications and working with data ingestion, ETL, and data processing. Interested in Data Engineering, analytics, and scalable data processing.

EDUCATION

Techno International Newtown

Expected 2027

Bachelor of Technology (B.Tech) in Information Technology

TECHNICAL SKILLS

Languages	Java, SQL, TypeScript, JavaScript
Data Engineering	ETL, Data Validation, Data Processing
Databases	MySQL, Appwrite
Backend	PHP, Java Servlets, REST APIs
Frontend	HTML5, CSS3, Bootstrap, React, React Native
Core Concepts	DBMS, Data Structures and Algorithms, Object-Oriented Programming
Tools	Git, GitHub, VS Code, XAMPP

PROJECTS

Inventory Management System

GitHub

PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, XAMPP

- Developed a web-based inventory management system for managing products, stock, suppliers, and inventory records.
- Implemented role-based authentication for admin and customer users with session-based access control.
- Integrated Google Sign-In to allow users to register and authenticate using their Google accounts.
- Implemented product CRUD operations, image uploads, stock tracking, low-stock identification, and product updates/deletion.
- Designed an interactive dashboard displaying total products, available stock, and low-stock items using MySQL data.

Student Management System

GitHub

PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, XAMPP

- Developed a web-based Student Management System for managing students, teachers, courses, and admission records.
- Implemented role-based admin and student login with session-based access control.
- Integrated MySQL for managing student, teacher, course, and admission information.
- Added modules for student management, teacher management, course management, and admission applications.
- Designed a responsive interface using HTML, CSS, Bootstrap, and JavaScript.

ACHIEVEMENTS

- Developed and deployed database-driven academic projects using PHP, MySQL, and Java-based technologies.
- Built practical projects involving authentication, database management, CRUD operations, and data processing.

AREAS OF INTEREST

Data Engineering, Data Analytics, Database Management, Software Development, Scalable Data Processing
